Q&A

Introduction

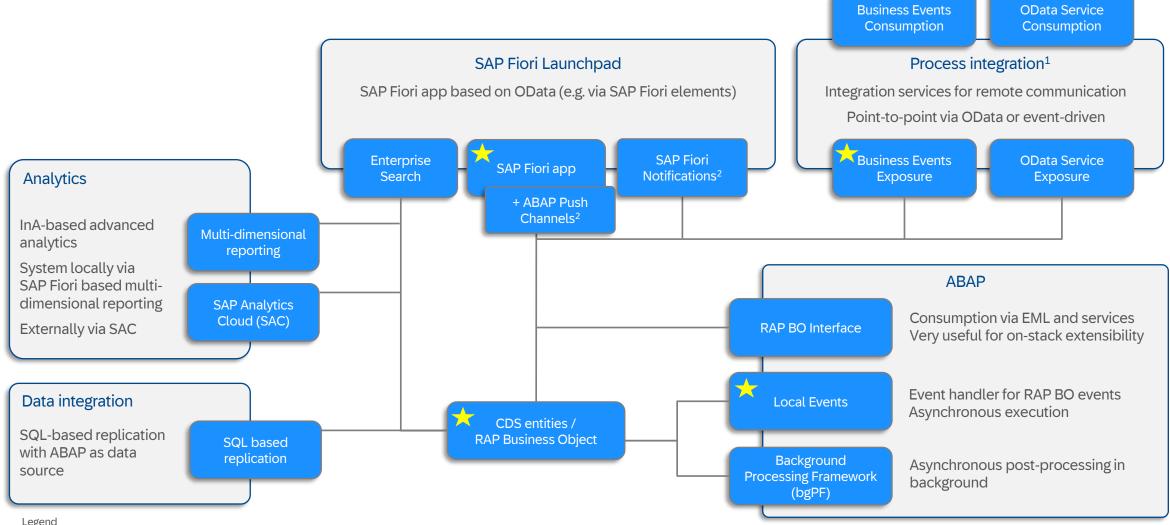

ABAP Cloud – One development model for SAP S/4HANA and SAP BTP

 $^{^{1}}$ SAP S/4HANA any premise or SAP S/4HANA Cloud Private Edition release ≥ 2022 2 SAP S/4HANA Cloud Public Edition release ≥ 2208, 3-system landscape required

ABAP Cloud – Supported scenarios

Legena

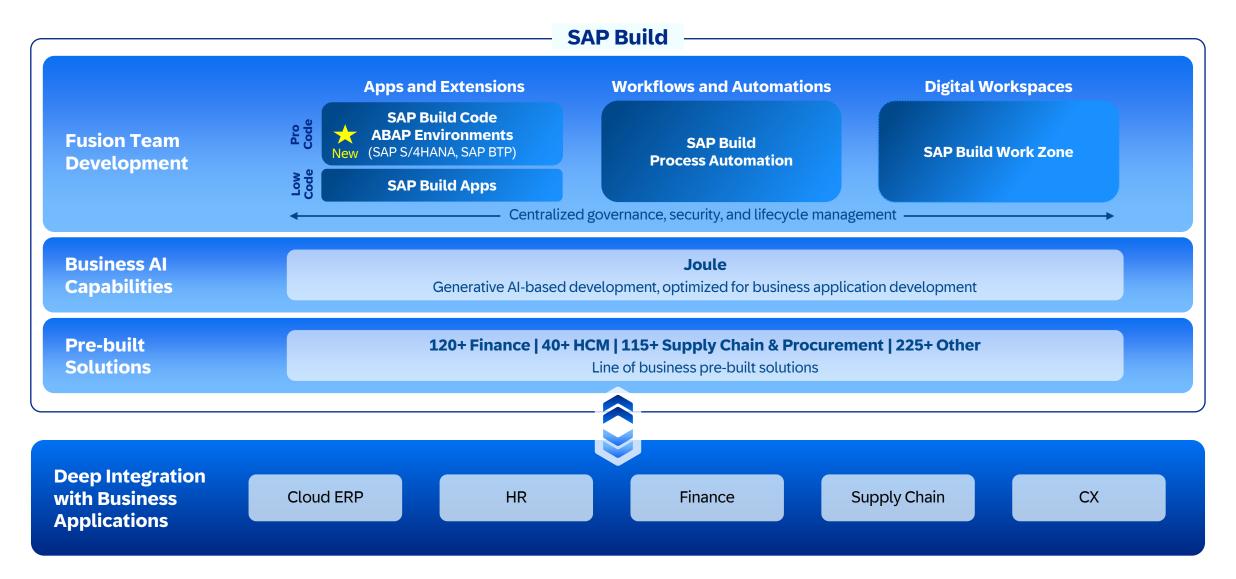

- RAP: ABAP RESTful application programming model

- CDS : Core data services- BO : Business object

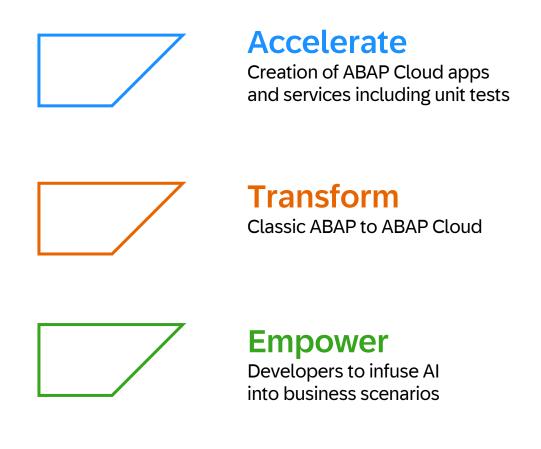

- InA : SAP Information Access protocol

¹ HTTP, SOAP etc. are also part of ABAP Cloud

SAP Build: Generative AI-powered business application development & automation on SAP BTP

Main use cases for GenAl in ABAP

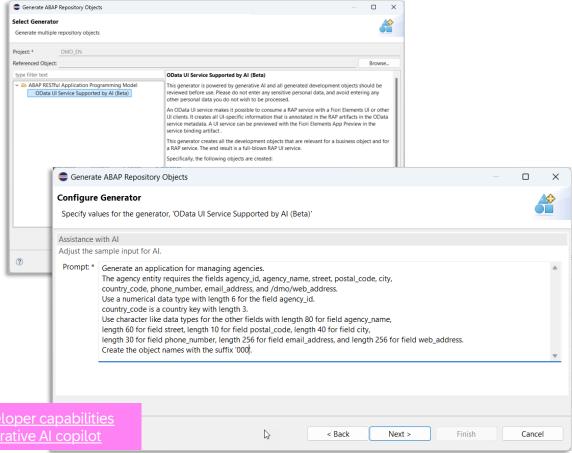

Accelerate: Joule's ABAP developer capabilities *

Increase development efficiency by leveraging GenAI assistance in the ABAP Development Tools

- Code prediction
- Code explanation
- Unit test generation for ABAP classes and CDS views
- Generation of RAP business objects and services

Example: Generation RAP business objects and services

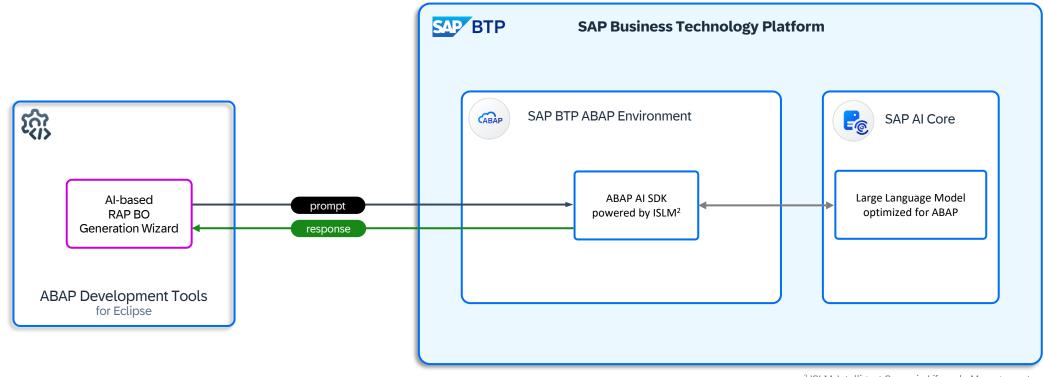

/Watch deep dives

AD107 | Boost your code efficiency: Explore Joule's ABAP developer capabilities

AI104 | Revolutionize ABAP development with Joule, our generative AI copilot

Simplified architecture for the AI-based RAP BO Generator ¹

² ISLM: Intelligent Scenario Lifecycle Management

/please note

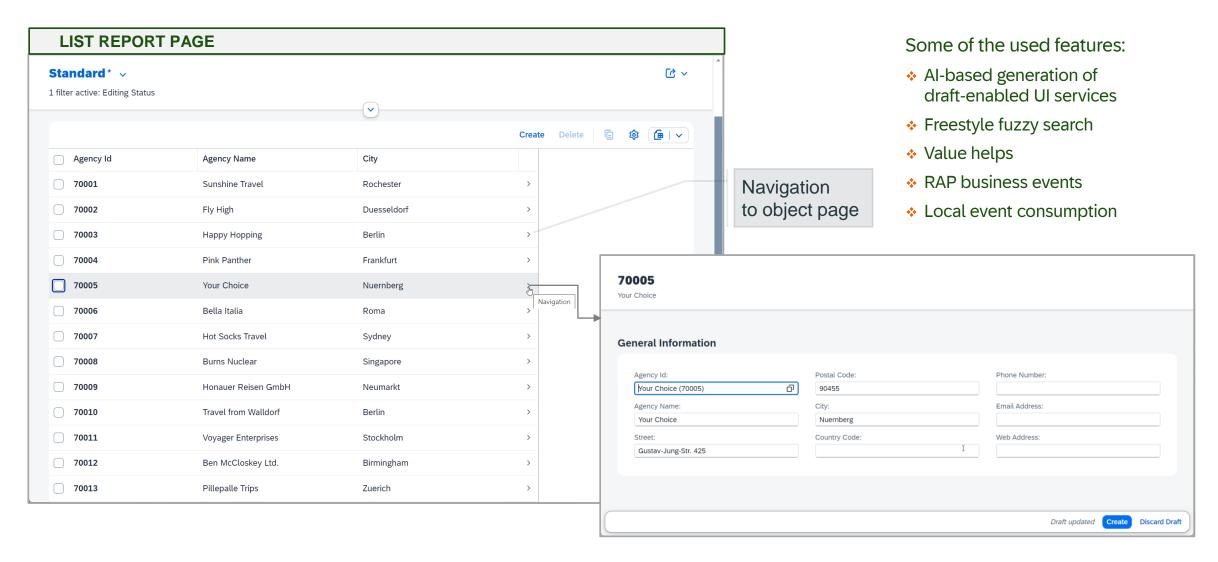

The SAP BTP ABAP Environment trial is only connected to the SAP Al Core for the SAP TechEd Virtual 2024 from 8 to 11 October 2024.

Today's scenario – Overview

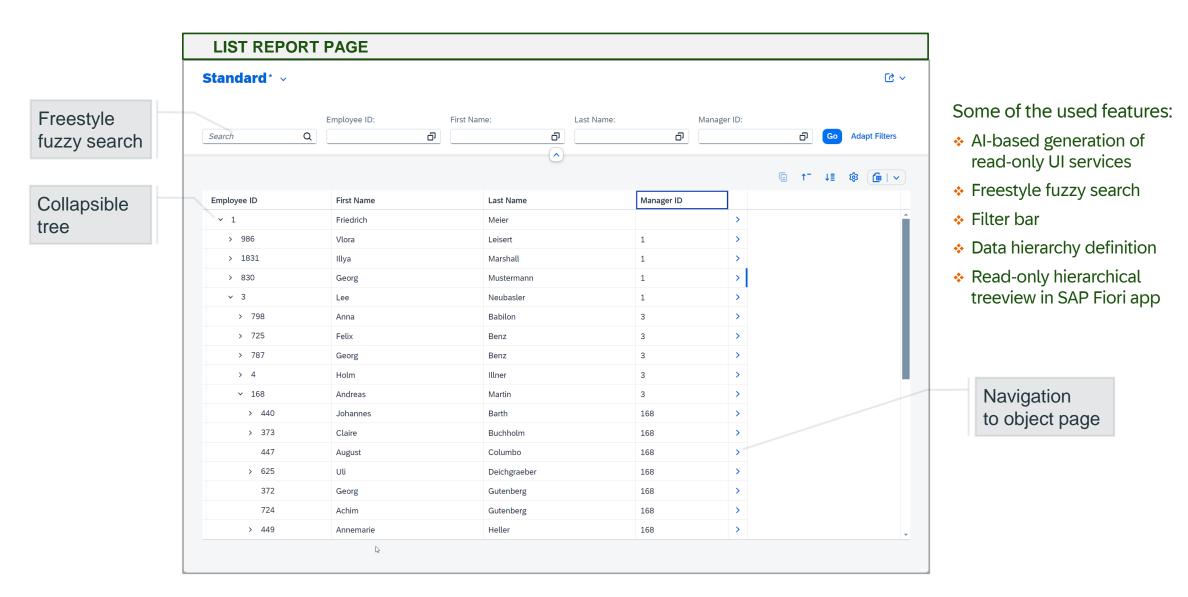

Block A – Build a transactional SAP Fiori app with RAP

with search, filter and draft capabilities, and business events

Block B – Build a read-only SAP Fiori app with hierarchical treeview

Today's scenario – Exercises

The AD180 hands-on exercises

PREREQUISITES

Create a free SAP BTP ABAP Environment trial user (see <u>Tutorial</u>) – connected to SAP AI Core <u>only</u> during the SAP TechEd Virtual 2024 week Set up your ABAP Development Tools for Eclipse (see <u>Tutorial</u>)

Create an ABAP cloud project to connect ADT to the ABAP environment (see Tutorial)

01 Generate a transactional OData UI Service E2E with Joule's ABAP developer capabilities

BLOCK A

- **102** Enhance the RAP BO behavior with a business event and consume it locally
- **03** Play around with the AI-based ADT Wizard
- **04** Generate a read-only OData UI service with Joule's ABAP Developer capabilities

BLOCK B

- **05** Implement the read-only treeview for hierarchical data display
- 06 Create an SAP Fiori elements app with SAP Business Application Studio and deploy it to the ABAP Environment

OPTIONAL

14

DEMO

The AD180 hands-on exercises – Working on GitHub (1)

Follow the step-by-step instructions provided on <u>GitHub</u>.

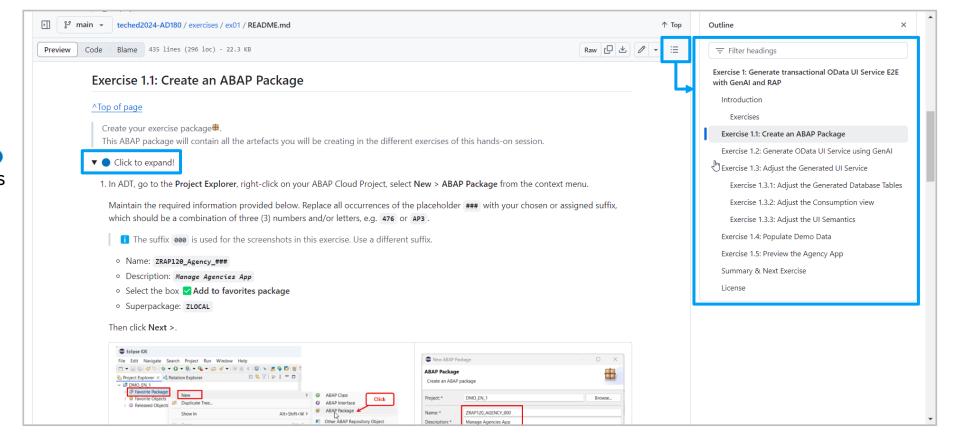

16

The AD180 hands-on exercises – Working on GitHub (2)

Use the Outline view to get a quick overview of the exercises.

Always click on ▶ • to expand the details

The AD180 hands-on exercises – Working on GitHub (3)

Make use of Copy raw contents button to easily copy code snippets

Always replace all occurrences of ### with your chosen suffix in code snippets

```
CLASS zgenerate_agency_data ### DEFINITION

PUBLIC

FINAL

CREATE PUBLIC.

CLASS zgenerate_agency_data ### IMPLEMENTATION.

ENDCLASS.

CLASS zgenerate_agency_data ### IMPLEMENTATION.

METHOD if_oo_adt_classrun~main.

"delete any existing active and draft data, if available

DELETE FROM zagency ###
```

/please note

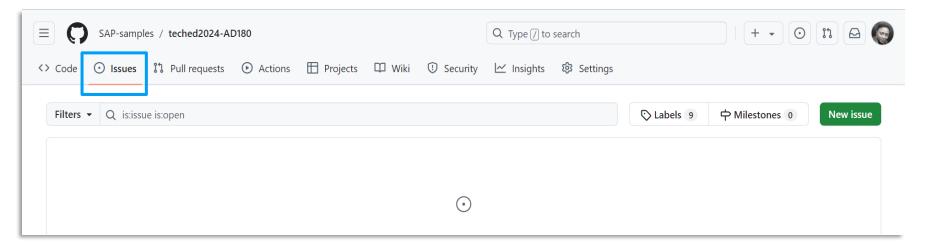

The names of the generated repository objects and fields in your exercise package may differ from those used in the exercise description, code snippets, and screenshots.

18

The AD180 hands-on exercises – Working on GitHub (4)

Open GitHub Issues to get help from the SAP experts.

Wrap up

Key takeaways

ABAP Cloud is the development model provided for building cloud-ready enterprise services, apps, and extensions on SAP BTP ABAP Environment and all editions of SAP S/4HANA¹, in the cloud and on-premise.

Development that is done with ABAP Cloud adheres to the **clean core principles**.

The ABAP Cloud feature set is enhanced quarterly in SAP BTP ABAP Environment, twice a year in SAP S/4HANA Cloud Public Edition, and every two years in SAP S/4HANA and SAP S/4HANA Cloud Private Edition¹ as of release 2023.

Check out the <u>ABAP Cloud Release Notes</u> and the <u>ABAP Cloud Roadmap Information</u>.

The introduction of **generative AI in ABAP**² will help **accelerate** the development processes, **improve** the transformation of existing custom code, and **empower** developer to easily infuse AI into ABAP-based business scenarios.

¹ SAP S/4HANA any premise or and SAP S/4HANA Cloud Private Edition release ≥ 2022 SAP S/4HANA Cloud Public Edition release ≥ 2208, 3-system landscape required

²This presentation and SAP's strategy and possible future developments are subject to change and may be changed by SAP at any time for any reason without notice.
